Course ES-4
Advanced Stress Analysis Methods for Composites

Course Summary

This course is now merged into ER-3/ES-4. Please refer to the ER-3/ES-4 course desciption above for details.

Introduction

TBD-Coming Q-2 of CY22

Topics

TBD

Course Benefits

Attendees will have a better understanding of the complex analysis supporting FEA software and will gain knowledge of the global composite structure as a whole.

Prerequisites

ES-3 Design of Composite Structures, or

ER-2 Advanced Aerospace Repair Analysis and Substantiation

Teaching Method

Active classroom lecture and workshop exercises

CEU

3.6
